2010 Canadian Wheat Board (CWB) Receivables Adjustment Worksheet Guide

This guide explains the purpose of the AgriStability CWB Adjustment Worksheet and provides instructions on how to complete the form. For a complete outline of all program guidelines or participation requirements for AgriStability, please refer to the Saskatchewan Crop Insurance Corporation's (SCIC) AgriStability Program Handbook.

About the CWB Receivables Adjustment Worksheet

The AgriStability program values changes in inventory using the start of year price (P1) and the end of year price (P2). For crops marketed through the CWB, the start of year price (P1) is based on the Early Payment Option of 100 per cent (EPO 100) in place at the start of your fiscal year. The end of year price (P2) is based on the EPO 100 in place at the end of your fiscal year. The EPO 100 represents the highest estimated value that most producers can receive at year-end.

Why is a CWB Receivables Adjustment required?

The EPO 100 price more closely reflects the full value of CWB commodities at year-end. However, many producers sell their CWB commodities using the initial price, which is less than the EPO 100 at year-end. As a result, an additional receivables adjustment is required to ensure that your CWB commodities that were sold at the initial price, and your CWB commodities that are held in inventory, are valued at the same price.

For producers who have not submitted a CWB Receivables Adjustment (CWB-RA) worksheet (for the 2010 program year or in prior years), SCIC will calculate the CWB-RA using an estimate of the CWB commodities you sold into the active pool. This default calculation will be done automatically by SCIC based on the information you report on your 2010 AgriStability application. However, if you feel that the default calculation does not accurately reflect the value of your CWB sales, you may submit a CWB-RA worksheet.

Who should use a CWB Receivables Adjustment Worksheet?

The CWB-RA worksheet is an optional AgriStability program feature that you may use instead of the default calculation. The worksheet allows you to calculate the CWB-RA using actual sales and the pricing option you used when you sold your CWB commodities into the active pool.

The CWB-RA worksheet is suggested for participants who:

- sell their CWB commodities using the Early Payment Option;
- sell their grain outside of the CWB pool by using Producer Payment Option (PPO) contracts such as Flex Pro, Daily, Basis or Fixed Price Contracts;
- carry over inventory of CWB grain from one pool year to another pool year;
- suffer a disaster to stored grain; or
- determine that the default calculation does not accurately reflect the projected value for their operation.

2010 Canadian Wheat Board (CWB) Receivables Adjustment Worksheet Guide

If you submit the 2010 CWB-RA worksheet, your 2010 AgriStability benefit will be calculated based on the information you provide. SCIC will not compare the two methods to determine which one is more beneficial.

If you submit this worksheet as an adjustment to your 2010 AgriStability benefit, any additional benefits resulting from the recalculation will be paid to you, and any overpayments resulting from the recalculation will be repayable by you.

If you choose to use the CWB-RA worksheet in place of the default calculation you must continue to use it annually. SCIC will not process any future applications using the default calculation. You must submit a completed CWB-RA worksheet Schedule 2 in each subsequent year of participation by the application deadline.

How the Receivables Adjustment is Calculated

CWB-RA Default Calculation - SCIC automatically calculates the CWB-RA. The production and inventory information on your AgriStability form is used to estimate the quantity of CWB commodities you sold into the active pool (August 1 to your fiscal year-end). The estimated quantity of each CWB commodity sold is multiplied by the difference between the CWB initial price and the end of year price (P2) for that commodity. This produces a dollar value that is included as a receivables adjustment in the calculation of your program year margin.

CWB - RA Worksheet - The CWB-RA worksheet allows you to calculate the CWB-RA and submit information to SCIC to replace the default calculation. On the worksheet you report the actual quantity of CWB commodities that you sold into the active pool (August 1 to your fiscal year end). You then multiply the quantity sold by the adjustment value. This produces a dollar value for the receivables adjustment that SCIC will use in the calculation of your program year margin.

The adjustment values can be found in Appendix A: CWB Adjustment Factors, found at the back of this guide. The adjustment value is the difference in price between the EPO 100 and the initial, or EPO 80 per cent or EPO 90 per cent price at your fiscal year end.

For producers who have NOT submitted the CWB-RA Worksheet previously:

You must calculate both an opening and ending receivables adjustment (Schedule 1 and Schedule 2).

For producers who have submitted the CWB-RA Worksheet previously:

You must submit a completed CWB-RA worksheet Schedule 2 in each subsequent year of participation by the application deadline.

Who can use the CWB Receivables Adjustment Worksheet

To be eligible to use the CWB-RA worksheet you must file to the Canada Revenue Agency (CRA) and AgriStability on the cash basis.

If you use the CWB-RA Worksheet, use your Cash Purchase Tickets and Producer Payment Options contracts or statements to complete the CWB-RA worksheet. Do not submit these documents with the worksheet. However, you must be able to provide this documentation if requested by SCIC.

2010 Canadian Wheat Board (CWB) Receivables Adjustment Worksheet Guide

If you have NOT previously submitted the worksheet submit the CWB-RA worksheet to SCIC:

- **For Individuals.** If you are submitting the CWB-RA worksheet to SCIC at the same time as you are submitting your 2010 Harmonized Form to CRA, check the “CWB Receivables Adjustment Worksheet” box on page 1 of the 2010 Statement A.
- **For Corporations/Co-operatives and Other Entities.** If you are submitting the CWB-RA worksheet to SCIC at the same time as you are submitting your 2010 Corporations/Co-operatives/Other Entities (CCOE) form to SCIC, check the “CWB Receivables Adjustment Worksheet” box on page 2 of the CCOE form.

OR

- **As an adjustment after your 2010 AgriStability benefit has been calculated:** The CWB-RA Worksheet will be accepted as an adjustment if it is received by SCIC within 18 months of the issue date of your original 2010 Calculation of Benefits statement.

If you HAVE previously submitted the worksheet:

- You must submit a completed CWB-RA worksheet Schedule 2 in each subsequent year of participation.
- **For Individuals.** Submit the CWB-RA Worksheets to SCIC at the same time you submit your 2010 AgriStability harmonized form to CRA or by the application deadline. Please ensure you check the “CWB Receivables Adjustment Worksheet” box on page 1 of the 2010 Statement A. If the CWB-RA worksheet is not sent at the same time you send your 2010 AgriStability harmonized form to the CRA, processing of your application will be delayed until the worksheet is received by SCIC.
- **For Corporations/Co-operatives and Other Entities.** Submit the CWB-RA worksheet to SCIC at the same time you submit your 2010 Corporations/Co-operatives/Other Entities (CCOE) form to SCIC, or by the application deadline. Please ensure you check the “CWB Receivables Adjustment Worksheet” box on page 2 of the CCOE form. If the CWB-RA worksheet is not sent in at the same time you send your CCOE form to SCIC, processing of your application will be delayed until the worksheet is received by SCIC.

Do not send the CWB-RA worksheet to the CRA. Send your completed CWB-RA worksheet to:

Saskatchewan Crop Insurance Corporation (SCIC)
484 Prince William Drive
PO Box 3000
Melville, SK S0A 2P0
Fax toll-free: 1-888-728-0440

How to Complete the CWB Receivables Adjustment Worksheet

Note: If you have previously submitted the CWB-RA Worksheet, you only need to complete and submit *Schedule 2 -Year-end Adjustments*. Disregard the instructions that pertain to completing *Schedule 1 - Opening Adjustments*.

Participant Information:

- List your Personal Identification Number (PIN) and SCIC ID Number.
- Provide your name, address, and contact information.
- Provide your fiscal period start and end dates for your 2010 fiscal year.
- Sign and date the form.

Schedules 1 and 2

Note: If you have previously submitted the CWB-RA Worksheet, you only need to complete and submit *Schedule 2 -Year-end Adjustments*. Disregard the instructions that pertain to completing *Schedule 1 - Opening Adjustments*.

- Complete the applicable sections for all CWB wheat and barley that you sold into the active pool at the initial price, EPO 80 per cent, and EPO 90 per cent. *Do not report commodities that you sold using EPO 100 or PPO contracts.*
- For *Schedule 1- Opening Adjustments*, report all CWB commodities that you sold at the CWB Initial Price, the EPO 80 per cent or the EPO 90 per cent from the start of the CWB crop year (August 1) to the end of your previous fiscal year.

Example 1:

If your 2009 fiscal year end was December 31, 2009, report all CWB commodities that you sold at the CWB Initial Price, the EPO 80 per cent or the EPO 90 per cent from August 1, 2009 to December 31, 2009.

Example 2

If your 2009 fiscal year end was March 31, 2009, report all CWB commodities that you sold at the CWB Initial Price, the EPO 80 per cent or the EPO 90 per cent from August 1, 2008 to March 31, 2009.

- If none of the columns are filled in *Schedule 1 – Opening Adjustments* SCIC will assume:
 - you did not farm in the 2009 fiscal year;
 - no CWB commodities were sold into the active pool (*August 1 to your fiscal year end*); or
 - all CWB commodities were sold using EPO 100 or PPO contracts such as Fixed Price Contract.

2010 Canadian Wheat Board (CWB) Receivables Adjustment Worksheet Guide

- For Schedule 2 – *Year-end Adjustments*, report all CWB commodities that you sold at the CWB Initial Price, the EPO 80 per cent or the EPO 90 per cent from the start of the CWB crop year (August 1st) to the end of your current fiscal year.

Example 1:

If your 2010 fiscal year end was December 31, 2010, report all CWB commodities that you sold at the CWB Initial Price, the EPO 80 per cent or the EPO 90 per cent from August 1, 2010 to December 31, 2010.

Example 2:

If your 2010 fiscal year end was March 31, 2010, report all CWB commodities that you sold at the CWB Initial Price, the EPO 80 per cent or the EPO 90 per cent from August 1, 2009 to March 31, 2010.

- If none of the columns are filled in *Schedule 2 – Year-end Adjustments* SCIC will assume:
 - no CWB commodities were sold into the active pool (*August 1 to your fiscal year end*); or
 - all CWB commodities were sold using EPO 100 or PPO contracts such as Flex Pro.
- If you are involved in multiple farming operations, complete Schedule 1- *Opening Adjustments* and Schedule 2 – *Year-end Adjustments* for each operation, using the same operation numbers that you provided on your 2010 AgriStability harmonized form or Corporations/Co-operatives/Other Entities form.

Column A – Code

- Enter the codes for the commodities sold using the code list in Appendix A. The commodity codes should match the commodity codes reported on your 2010 AgriStability form.

Column B – Crop/Grade

- Enter the matching crop description of the inventory code in column A.

Column C – Price Method Used

- Enter 1 if the grain was sold at the CWB Initial Price.
- Enter 2 if the grain was sold at EPO 80 per cent.
- Enter 3 if the grain was sold at EPO 90 per cent.

Column D – Quantity Sold

- Provide the quantity sold in metric tonnes. Include the sales of all commodities that you sold at the CWB Initial Price, EPO 80 per cent, or EPO 90 per cent into the active pool.
- Include commodities that you produced during the program year and commodities that you produced in previous years but sold into the active pool.
- If the income from the sale was deferred until a later fiscal year, the quantity sold should still be reported on the worksheet if it was sold into the active pool at the CWB Initial Price, EPO 80 per cent, or EPO 90 per cent.

Column E – Adjustment Value \$

- Enter the Adjustment Value using Appendix A: **CWB Adjustment Factors**. Report the value for each code for the month of your fiscal year end.

Example:

If your fiscal year end is December 31, on Schedule 1 *Opening Receivables Adjustment*, use the December 2009 Adjustment Value. For Schedule 2 *Ending Receivables Adjustment*, use the December 2010 Adjustment Values.

Column F – Receivables Adjustment

- Enter the quantity sold (column D) multiplied by the Adjustment Value (column E).

Receivables Adjustment Total

- Enter the total of all entries in column F for each section.
